Date of Birth
07 April 1997

LANGUAGES

Italian — Native
English — Fluent (C1)

EDUCATION

University of Salento
B.Sc. IT Engineering / 2016 — 2019

ASSESSMENT TYPES

- Web Application Pentesting
- Infrastructure / Network
- Wireless Networks
- OSINT & Threat Intelligence
- Attack Surface Management
- Bug Bounty Coordination
- AI Red Teaming

CLIENT SECTORS

- Banking & Finance
- Insurance
- Healthcare & Pharma
- Energy & Utilities
- Telco / ISP
- Public Sector / Gov.
- Retail & E-commerce
- Media & Entertainment
- Logistics & Transport
- Technology & SaaS
- Consulting Services

CORE TOOLS

- Burp Suite
- Nessus
- Nmap
- Garak
- LLMmap
- Metasploit
- Shodan
- Nuclei
- Nikto
- PyRIT

INTERESTS

- History
- Trekking
- Martial Arts

I authorize processing of personal data pursuant to GDPR (EU) 2016/679 and D.Lgs. 196/2003.

Andrea Guida

Offensive Security Specialist with 5+ years of hands-on experience in penetration testing, vulnerability assessment, and cyber threat intelligence across 20+ enterprise clients in 11 industries. Proven track record of identifying 50+ critical and high-severity vulnerabilities (XSS, SQLi, IDOR, SSTI, XXE, LFI, Open Redirection, CSV Injection, Host Header Injection) and delivering 50+ technical and executive reports. Skilled in coordinating offensive security teams, managing client engagements end-to-end, and translating technical findings into strategic recommendations. Actively transitioning into AI Red Teaming — applying a deep adversarial mindset to LLM security, prompt injection, and AI threat modeling. Actually Studying for OSAI+ Certification, and i'm planning to study OSCP after.

WORK EXPERIENCE

Offensive Security Consultant — VLAP
07/2025 — Present
Neverhack Italy Spa | Assago(MI)—Hybrid

- Working as a VLAP (Valutatore del Laboratorio Accreditato di Prova) for ACN engagements — conducting penetration tests in air-gapped environments under the Italian national cybersecurity framework.
- Assessing and validating the security posture of critical national infrastructure within strict regulatory scope.
- Conducting Web Application Penetration Testing (WAPT) engagements across multiple sectors, identifying and reporting vulnerabilities following OWASP methodology.

Offensive Security Specialist
11/2024 — 01/2025
Banca Mediolanum | Basiglio (MI) — Hybrid

- Designed and executed a comprehensive offensive security program including penetration testing, institutions.
- Conducted Cyber Threat Intelligence (CTI): monitored threat actors, emerging TTPs, and CVEs to inform the security roadmap.
- Managed Attack Surface Management (ASM) program — continuous external exposure discovery and risk prioritisation.

Cybersecurity Consultant — Staff / Senior
06/2021 — 10/2024
EY Italy Spa | Bari (BA) — Hybrid

- Delivered 50+ penetration testing engagements (web application, infrastructure, wireless) across 20+ enterprise clients in banking, healthcare, energy, telco, retail, pharma, insurance, and public sector.
- Identified 50+ critical/high vulnerabilities including IDOR, SSTI, XXE, LFI, Open Redirection, SQLi, XSS, CSV Injection, and Host Header Injection across client environments.
- Led OSINT and threat intelligence activities; planned and scoped client objectives and coordinated on-site testing.
- Mentored and coordinated a junior team of 2-3 consultants; authored 50+ technical and executive- level security reports.
- Travelled to client sites across Italy for engagements requiring physical presence or local network access.

Cybersecurity & AI Researcher
10/2020 — 03/2021
SindSrl | Lecce(LE) — Remote

- Researched facial recognition, object detection, and target-tracking algorithms for UAVs in defence operations; designed secure data transmission protocols for drone-to-ground channels.
- Working at the intersection of AI and cybersecurity ignited a lasting passion for both fields — an experience that directly informs the transition into AI Red Teaming.
